

# SoundCheck™

## USB Hardware Key Driver

Please install SoundCheck and then run the installation for the USB Hardware Key before running SoundCheck.

1. Open the SoundCheck CD and open the USB Hardware Key folder, found under Drivers.
2. Run the file “USB Hardware Key Driver Setup.exe” and reboot the computer.
3. Copy the file “kechk32.dll” to the root of your SoundCheck folder and overwrite the existing file.
4. Run SoundCheck and the program will recognize the new USB key.
